From imusti : East End Fashionistas before purchasing it in order to gage whether or not it would be worth my time, and all praised East End Fashionistas:

An edgy photographic celebration of the unique street style and remarkable personalities to be found in the new urban counterculture Multicultural, adjacent to Londons wealthy financial district, home to artists and designers of all stripes, Londons East End neighborhood is alive with creative possibility. Not unlike the denizens of Brooklyns Williamsburg, its inhabitants exhibit a highly individual sense of style, in keeping with their environment. Anthony Webbs

exhilarating portraits capture the expressive characters who populate the East End. His full-color shots framed against raw, vibrant backgrounds portray hundreds of self-fashioned individuals flaunting remarkably creative personal style. Animated by graffiti found on local streets, as well as quotes from style and cultural icons including Vivienne Westwood, Malcolm McLaren, and Alexander McQueen, this book encapsulates the avant-garde spirit of a new urban counterculture taking not just London but all major urban centers by storm. 295+ illustrations

About the Author Anthony Webb is a London-based photographer and artist whose work has appeared in numerous publications including the Thames Hudsons StyleCity series.
