An excellent primer on daily fantasy sports!!By Customer"Essential Strategies for Winning at Daily Fantasy Sports" is an excellent introductory primer to the new "daily" fantasy sports phenomena. Due to the newness of daily fantasy sports, there are few, if any, other books that educate the reader in the unique rules and strategies of most daily fantasy sports (football, baseball, basketball, hockey) and noting critical

differences between daily and traditional fantasy sports competitive strategies. After a short introduction to put everything into the appropriate context, the author quickly moves to the meat of the book and that is teaching a number of strategies to enable the reader to win consistently and profit in daily fantasy sports. Even though the book contains dozens of mathematical or "quant" strategies, perhaps its most useful recommendation is always emphasizing that playing daily fantasy sports is a combination of both "science" and "art", and continuously reminding the reader to "not to lose sight of the forest for the proverbial mathematical trees," as the book convincingly points out success will always involve a combination of both. If there is one small shortcoming, it's that the author doesn't make available a download version (in Excel perhaps) of all the formulas used in the book. However, this criticism is very minor as the formulas are very straightforward and should be simple for anyone with even the most basic understanding of Excel or other spreadsheets to easily replicate for personal use. To conclude, I highly recommend this book and if the author is reading this review hope to see a follow-up to this book containing more advanced strategies!!

About the Author
Kevin Bonnet discovered that his aptitude for math and love of card games was a winning combination during the online poker boom in the early 2000s. At blindspoker.blogspot.com he became an active part of the poker blogging community posting about poker strategy from his unique perspective. When the UIGEA threatened to bring the online poker boom to an end, he found a loophole in the law and launched the first modern, UIGEA compliant daily fantasy sports website called Fantasy Sports Live. He was an early daily fantasy sports strategy contributor at rotogrinders.com, penning many of the original strategy articles. He sold Fantasy Sports Live in 2013 and has become a profitable daily fantasy sports player on the top websites. He earned a BS degree in Electrical Engineering from UNLV and a Masters in Business Administration from Pepperdine University.
