What you get in reality is a book of grainy black and white photos that are hard to make out due to the reflections on the glass windows. This book is totally misrepresented and a huge disappointment.0 of 7 people found the following review helpful. Interesting????By HollieThe book is in black white, which obviously disappointed one reader, but I'm pretty sure the author does that on purpose. It's pretty much what I expected. I met the author when he was promoting his son's book release. I think he does these picture books in

bw, to leave it up to the imagination of the reader. Interesting however, and unusual, none the less.

Photographer/author, Michael Malott (Blvd. of Broken Dreams) once again presents a compilation of photography art centering on one single subject. In FASHION WINDOW, Malott has assembled over one hundred photographs taken directly from window displays at leading fashion retail locations, including Luis Vuiton, Coach, Hugo, Diesel, Macy's, Bloomingdales, Tiffany, Aramani, and more. In typical contrasting Malott style, he has presented each of these images in black white format, to leave colors to the imagination of the reader.
