I think this is the era when Kasparov was at his strongest! The matches with Karpov made him one of the greatest and strongest players ever. A lot of deep analysis and games but I still think his Test of Time is his greatest work! It is amazing how he was able to stave off all of the new generation of chess players in this era and remain on top! You can't do wrong studying the

games of Kasparov it will improve your chess tremendously.3 of 13 people found the following review helpful. I guess Gary thinks that the line of real champions ended with him. I also think he retired early due to Adult ADHD since he seems to always have to go somewhere and meet somebody. This means he was losing the ability to simply play classical chess at the highest levels. On the whole, his books are worth the money and time to go through. I just wished he would have ended up with the same sense of history that he started out with.
