These Extra Large logic puzzles range in size from 60 x 15 pixels to a huge 100 x 75! The giant puzzles had to be reduced to a small size to fit on the 8 1/2 x 11" pages, so you'll want to have some fine-tipped pencils or pens available, and a book-marker or other straightedge to help keep your place. There are 95 puzzles so this could take a while to go through. As with all images, the more pixels, the greater the detail of the picture, so if you've got the patience to do them, you won't be disappointed. The one thing that I really wish Griddlers would do is to make their books spiral-bound for greater ease of puzzle solving. 0 of 0 people found the following review helpful. Griddlers puzzles, also known as Picross or Nonograms, are picture logic puzzles in which cells in a grid have to be colored or left blank according to numbers given at the side of the grid to reveal a hidden picture. Some people compare Griddlers to Sudoku. However, the Griddlers puzzles always reveal a nice image as a result. This book consists of 89 Griddlers puzzles of size exceeding 50 cells. The solutions of the puzzles appear at the end of the book.
