Griddlers Team : Griddlers Logic Puzzles: Extra Large (Volume 3) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Griddlers Logic Puzzles: Extra Large (Volume 3):

0 of 0 people found the following review helpful. Very disappointed By Tallysue Don't buy this book unless you have exceptionally good eyes. I can't do over half of the puzzles because the grid size is sooooo small. Some of them I can't even read with a magnifying glass. I just measured one of the puzzles with my husband's help and each individual square is 1/18 of an inch!! That's 1/18th not 1/8th. I have occasionally had to look at a number or two with the magnifying glass before, no big deal. But this is ridiculous. Well, honestly I would still buy this book because there are several puzzles I can do and I've always been very happy with all of the other Griddlers magazines. I'm just so disappointed!!!! 0 of 0 people found the following review helpful. Love it - but needs a magnifying glass By Cathy I generally love griddlers logic puzzles and can't wait for their next one to come out - sadly this one is going to be difficult to do - several of the puzzles are going to need a magnifying glass to read the numbers - I have a 0.3mm

pencil but I think it will be too big to draw the blocks. There are 10 blocks in 5/8 inch. - normally they blocks are about 10 per 1 1/4 inch. 0 of 0 people found the following review helpful. Not for old eyes! By Tamara Adler It would help if you clarified that extra large meant ALL really big puzzles with very tiny squares and not as in large print for older eyes! Puzzles would be fine if I didn't have to do them while using a magnifying glass!

Griddlers logic puzzles, also known as Picross or Nonograms, are picture logic puzzles in which cells in a grid have to be colored or left blank according to numbers given at the side of the grid to reveal a hidden picture. Some people compare Griddlers to Sudoku. However, the Griddlers puzzles always reveal a nice image as a result. This book consists of 91 Griddlers puzzles, each of them has at least on side bigger than 50 cells. It means the puzzles are really difficult. So if you are not griddlers expert please don't buy this book. The solutions of the puzzles appear at the end of the book.

About the Author Griddlers team is a leader of an online community dedicated to logic puzzle games. The Griddlers team creates variety of logic puzzles, from the well known Sudoku through several similar number logic puzzles like Kakuro, KenKen, Futoshiky, Skyscrapers, and Binary. Their best puzzles are Griddlers, also know as Nonograms or Paint by Numbers, with a special three directional variant named Triddlers.
