Erwin Brecher : How Do You Walk on Fire?: And Other Puzzles: 101 Weird, Wonderful and Wacky Puzzles with Science before purchasing it in order to gage whether or not it would be worth my time, and all praised How Do

You Walk on Fire?: And Other Puzzles: 101 Weird, Wonderful and Wacky Puzzles with Science:

4 of 4 people found the following review helpful. Not as good as How to Get an Egg into a BottleBy AnitaI ordered both How Do You Walk on Fire? and How To Get An Egg Into a Bottle ... the second one is a better book. I'm not crazy about the layout of either. It asks the question and then you have to go to the back of the book to find the answer. It would have been better to have the question on the first page and then turn to the next page for the answer. The format is hard on little kids which is who this is written for. Not great planning by the publisher. I would say, don't waste your time on this one and go for the Egg in a Bottle book instead.0 of 0 people found the following review helpful. Five StarsBy Roger PrucinoGave as a gift; niece loves it.3 of 3 people found the following review helpful. How do you walk on fireBy S. WinnVery interesting book filled with some great questions and answers and a lot of useless (but extremely fun) questions and answers. I would prefer to have the answers on the same page (it's not a school text book that it matters if you sneak a peek). This would save constantly flipping pages back and forth.

One hundred more fascinating science puzzles that explain scientific principles in fun, accessible, and easy-to-understand terms A follow-up to the delightful How Do You Get an Egg into a Bottle?, this amusing puzzle book yet again allows people to have fun while they learn by undertaking a wide variety of brain bending questions rooted firmly in scientific fact. By taking a new and unique look at puzzle questions, it teaches a wide variety of mesmerizing lessons such as how to boil water in your palm, how to travel faster than the speed of light, why you can crack your knuckles, and how to walk on fire.
