From Simon Schuster Interactive : I.M. Meen before purchasing it in order to gauge whether or not it would be worth my time, and all praised I.M. Meen:

1 of 1 people found the following review helpful. I. M. Meen By myrriell homeschooled my children and this program was fantastic. It teaches grammar rules. I thought the program was a little heavy on the maze and troll arcade activities, but my children are in college and married now (all but the bonus baby) and still remember this program and refer to it often. So, now the 11 yr. old son wants to play it. It will be perfect for him, I can't find my copy so I'm here to buy a used one. It is a good program, and obviously the arcade does motivate them to keep working! Myrrie

From the Publisher Come closer. Meet the nasty I.M. Meen in his Magic Labyrinth. It's dark, it's twisted, and you'd better use your agility and your brain. Giant Spiders, Rat Men, Gargoyles and seriously sloppy writing lurk around every creepy corner. Watch out for that Sludge Ball... it'll mess your screen! Zap that Frankenmeen with your Fire Wand. Ready for a juicy explosion? Take aim and fire with a handful of Explode-O-Fruit. Jump! It's a Mad Scientist swinging a stethoscope. Good work. Now get ready: The further you go, the "Meener" it gets! FEATURES: Smooth scrolling, state of the art 3-D action Challenging educational content, Teacher-tested and approved 36 action-packed levels and over two dozen intelligent enemies Over 150 scrolls riddled with grammar punctuation errors to combat System Requirements for DOS: DOS 5.0 or better 486/25 MHz processor or better 4MB RAM or more 256-color

VGA board and color monitor 2x speed or faster CD-Rom drive Hard drive, Microsoft compatible mouse and driver
SoundBlaster 16 or 100% compatible sound card END
