York P. Herpers : Icehockey - The Cool Board Game before purchasing it in order to gage whether or not it would be worth my time, and all praised Icehockey - The Cool Board Game:

In this very fast dice game, the players try to keep the puck in their ranks and bring it right in front of the opposing goal. The puck changes per die roll from position to position. Here, dice luck and willingness to take risks decide if it is kept or lost to the opponent. The exciting back and forth on the field makes many scoring opportunities for a big game. Due to the high proportion of luck, it is also suitable for young fans from 5 years on. The game is such a joy that it is also often played by adults. Includes two game boards in A2 size, game pieces and dice cards for cutting out. The use of commercially available dice and game pieces is possible. 24 pages in color.

About the Author York P. Herpers is a media professional, who always turns to new topics. He is a game designer, programmer, music producer, author, owner and founder of Herpers Publishing International.
