Realizing life in real life, and not the social media life - this is a MUST READ!By Francis HofilenaOf all the non-fiction books I read, this is my ULTIMATE FAVORITE. As someone who is not new into dating people I met online, and making interactions with people I just saw on social media, I recommend this book - it changed the way I look at life we live physically and the life we live on social

media. There are many significant take aways that you can learn from here and best realized in real life. After reading this book, I have a complete change of perspective on "managing" real life versus "virtual" life. Especially nowadays, I believe 80% of the people seeks self validation from people online. I recommend this book, for people who are: 1. Experienced online dating, both successful and not successful 2. Tired of living a life full of nonsense - from people you barely know from online 3. For those who are hopeless romantic, and wanted something new and REAL 4. Those who want to live a happy life - free from pretentious people, lies, and self esteem issues. 1 of 1 people found the following review helpful. Overall its not a bad book and it does have some interesting information By Chris Smith Overall its not a bad book and it does have some interesting information. But it came with too many assumptions about why people use social media so much and it's a bit more of an autobiography than I was interested in reading. It would have been great too have a checklist for people to go down if they want to find out if their "friend" is a catfish. I couldn't finish it. 0 of 0 people found the following review helpful. great book on social media By Tina I bought this for research for the psychology behind those who catfish. And heck, I love the show. But Nev goes beyond that to get you thinking about loving yourself and looking at your own sometimes destructive if not at least distracting social media habits. He reveals his weaknesses and mistakes honestly to show that we can all change for the better.

From the host of MTV's #1 show Catfish comes the definitive guide about how to connect with people authentically in today's increasingly digital world. IN REAL LIFE: Love, Lies Identity in the Digital Age As the host of the wildly popular TV series Catfish which investigates online relationships to determine whether they are based on truth or fiction (spoiler: it's almost always fiction). Nev has become the Dr. Drew of online relationships. His clout in this area springs from his own experience with a deceptive online romance, about which he made a critically acclaimed 2010 documentary (also called Catfish). In that film Nev coined the term "catfish" to refer to someone who creates a false online persona to reel someone into a romantic relationship. The meme spread rapidly. Now Nev brings his expertise to the page, sharing insider secrets about: -what motivates catfish-why people fall for catfish-how you can avoid being deceived-rules for dating -- both online and off-how to connect authentically with others over the internet-how to turn an online relationship into a real-life relationship ...and much, much more. Peppered throughout with Nev's personal stories, this book delves deeply into the complexities of online identity. Nev shows us how our digital lives are affecting our real lives, and provides essential advice about how we should all be living and loving in the era of social media.

"Nev is a great philosopher of the internet and thereby a critical voice for our generation. Whether or not you're a Catfish fan, In Real Life is a must-read and shows us the opportunities and pitfalls that are part of the digital era. Nev makes it plain and simple: the power of the keyboard is now mightier than the sword." Matthew Segal, founder of OurTime.org "IN REAL LIFE is so much more than a book about online dating. It's about self-acceptance and being true to yourself in a world where you're influenced by so many people over the internet." Jonathan Bennett, host of MTV's Copycat "What I find most exciting about IN REAL LIFE is how it explores the Internet's impact on our perception of gender and sexuality, and how we portray our digital selves to the world to that end. As a fellow millennial, I'm constantly trying to adapt to how the digital age is molding our ideas of love and relationships. In Real Life does not attempt to define these ever-changing terms but instead works to understand them." Kim Stolz, author of Unfriending My Ex "Finally someone has written a smart and funny guide that helps young people navigate social media without letting it take over their lives." Maude Apatow, actress and twitter personality "Nev's book begins as a fun journey into the world of lying on the internet, but it extrapolates into the larger phenomenon of avatars -- everybody has one on social networks." James Franco for Vice magazine "The book is at once a memoir, a meditation on a truly unique phenomenon of the internet age, and a motivational address for anyone seeking virtual companionship. Schulman cautions his readers against lying on their social media profiles, and argues instead for improving "offline" life. "Embrace who you really are, both online and off" is the message at the heart of his book." Publishers Weekly About the Author Nev Schulman is the host of MTV's #1 series, Catfish, which 2.6 million people watch in the U.S., plus millions more worldwide in 25 other countries.
