Farid Chenoune : Jean Paul Gaultier before purchasing it in order to gage whether or not it would be worth my time, and all praised Jean Paul Gaultier:

A brief but interesting look at the world of GaultierBy nowhereboyAs with the other books in the Universe of Fashion series, the Gaultier edition is mainly a photo look-book into the world of the designer. There is a short introduction about Gaultier, as well as a timeline of major events and collections in Gaultier's career. The photos used in the book are a good representation of Gaultier's clothing from his entire career, highlighting key pieces, and often showing them in

interesting ways (a women's velvet cone bra dress is worn by male model Tanel in one photo for example). A great book for any Gaultier or fashion aficionado.

Since exploding onto the fashion scene with his first collection in 1976, Jean-Paul Gaultier has never ceased to astonish us with his inventiveness, his energy, and his capacity to playfully experiment with the bizarre and magic concept of fashion.
