Robert Emmert : Solve Extreme Sudoku: Strategies for Easy To Hard Puzzles before purchasing it in order to gage whether or not it would be worth my time, and all praised Solve Extreme Sudoku: Strategies for Easy To Hard Puzzles:

0 of 0 people found the following review helpful. Sudoku for the AgedBy Timothy M. McCannI gave this book three stars because I bought it and read it on my Kindle. There were a lot of examples in the book which would have been better absorbed if this was a regular book - and had the examples as pull outs. The other drawback was the size of the

print in the examples. So there I was squinting and trying to page back - and losing my page - and my patience. Because when I am working a Sudoku puzzle - I use a nifty crib sheet I invented - and its always on an 8 1/2 X 11 piece of paper. Much easier to see. 1 of 1 people found the following review helpful. Clever and Logical Sudoku book By meh2k This book offers lots of clear and straightforward ideas on how to 'unblock' yourself when you're stuck in a Sudoku puzzle. It also includes examples and exercises that help you understand strategies on how to correctly "populate" the board when you are starting a new puzzle. 1 of 2 people found the following review helpful. One Star By Mark Richards Terrible: very hard to understand, poorly written, not very helpful. Would like to send back if possible!

After a short discussion of Sudoku and presentation of tools in Section 1, this book gives a review of standard techniques or strategies to solve these puzzles in Section 2. Section 3 will treat advanced solution techniques that will allow the most difficult puzzles to be solved. The primary focus of the book is on this section, and the reader should find these techniques easy to apply to achieve success. Section 4 gives 14 exercises that will allow the reader to practice the techniques given in section 3. These exercises, with solutions, provide additional instructions on the application of section 3 techniques. Section 5 gives 16 puzzles to solve, with answers. The first 4 puzzles are for warm up and are labeled Evil. The 12 puzzles that follow the Evil puzzles are very difficult and are labeled Extreme. This section could be considered a graduation exercise.

About the Author Robert (Bob) Emmert is a retired aerospace engineer. Bob has been working Sudoku puzzles for five years, and has developed some solution techniques, given in this book, that should be helpful to Sudoku Warriors. Bob graduated from the University of Arkansas in 1953 with a BS in Electrical Engineering. After graduation Bob attended The Oak Ridge School of Reactor Technology (ORSORT) for one year to study Nuclear Engineering. He was then employed by the General Electric Co. on the Aircraft Nuclear Propulsion project and developed the reactor control systems for experimental reactors. Bob began his aerospace career with North American Aviation in 1961. He attended Ohio State University and received a MS in Electrical Engineering in 1964. He was the manager of Advanced Development Engineering for the Missile Division of Rockwell International and his technical expertise was Tactical Missile Guidance and Control. Bob (with another engineer) holds a patent on a strap down, guidance system for a tactical missile. Scott Gandert is the author of several books, most recently, Searching for Brakemen (Indiana: IUniverse, 2015). He holds an MBA with an emphasis in International Healthcare, an MA in Counseling Psychology, and a BA in English. He is a former teacher, former waiter, former landscaper, former counselor, former CB radio salesman, former small business owner, former private investigator, and full-time husband and father to 4 indoor cats. He is a Sudoku enthusiast and enjoys working the most difficult puzzles he can find
