Standards are high.- Largish size (big as any previous), 300 pages packed with prints.Artwork Balance: overall very good, with worries- Artists are given 2 page spreads, often in theme, as well as being mixed together. I like this!- Gold Silver winners get a full page with photo and commentary. This is nice, but borderline. More would be intrusive.- Humor is sparse, but there are enough lighter moments. (Little old witch kitten is delightful)- Dimensional art is good this year, and the other various categories are generally well represented.- Magical Realism. Do I detect a whiff of snobery against genre? (I am admittedly hypersensitive in this regard) This issue's judges skewed toward toward magical realism/mythology/symbolic. I like a good mix, but I buy my genre art book for the genre art. I would prefer a bit more high fantasy and the like.I am happy

Wide Spectrum of Artistic Talent By Mikko As an artist, you don't want to miss this series of the best artwork of this generation. I know that the art world is very subjective in itself but this magazine needs to be a great visual art inspiration and motivation. I'm reviewing this particular volume but applies to all the volumes produced by Spectrum. Each volume has its own beauty, originality, and just stunning artwork. People that could be a little naive about the sophistication and complexity of the artwork featured should try it and see if you can even get close. I admire the artistry, creativity, and overall presentation of these amazing artists. A great care to showcase the best of the best and how I wish each day that I would be granted with such talent. However, I don't mind being the one appreciating and praising the great work of these current artists. I'm impressed with this magazine that I can't help but express my appreciation and admiration with the magazines' collection or such artwork. 0 of 0 people found the following review helpful. Another fantastic collection By wiredweird The Spectrum series continues to deliver the very finest in fantasy art, in the widest possible range of styles, media, and venues. Categories include advertising, book art, comics, and more - including my favorites, the 'dimensional,' sculptural works. The styles range from classic realism (or surrealism), to inked line-drawings, to works that evoke medieval tapestries, to ... well, you name it, there are sure to be works here that have elements of it. Loose or literal, colored, BW, or barely tinted, The collection, the printing, and the sheer variety earn this highest marks - even if digital media increasingly dominate hard media of the traditional kinds. So, why not that fifth star? Earlier volumes in this series lightened the mood with a rich mix of more whimsical, humorous works. Humor seems in short supply this time. Light works can be just as serious as darker ones, but the general feel of this assembly has a grim edge to it. Still, it's a worthy successor, whether you look for inspiration in your own work or just want to wallow in imagination made real.-- wiredweird
