Chip Carter : Star Trek: Light-and-Sound Communicator (Miniature Editions) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Star Trek: Light-and-Sound Communicator (Miniature Editions):

28 of 28 people found the following review helpful. A little smaller than original! By Erik Be aware that this is not a 1:1 full size replica. It's close. I would say it's approximately 2/3 size and noticeably smaller than the real one. Can't beat it for the price. PROS- Looks, colors and textures like the original. Moire pattern disk, although stationary, gives the illusion of movement when you view it from different angles. The three LED gems (blue, red, blue) light up when buttons are pressed. Two buttons-two sounds. The button on left sounds the original chirping sound while the button on the right sounds a combination of static and radar-like beacon. The texture of the black plastic is bumpy like the original. And finally the price can't be beat when compared with other alternatives. CONS- NOT 1:1 - It's slightly smaller than the original at about 2/3 the size. All Plastic. The brass colored flip cover does not "flip" - you must physically open it with your other hand or use your finger on the hinge. Does not chirp when opened like the original - The left button does the chirp. It's also very light because of all plastic construction. Given its shortcomings I still rated it 4 stars because it's a decent replica and you can't beat the price when compared to others. It comes with a tiny 3"x2.5" booklet with full color photos from TOS and some useful information. Both communicator and booklet come in a full-color 3.5"x3"x1 7/8" box. 5 of 5 people found the following review helpful. Four Stars By Dune Great detail for small replica but seems not to far off for size.... 2 of 2 people found the following review helpful. Small enough to keep it hid By Neil A terrific prop to add to my Halloween costume. It's palm size makes it so easy to keep it out of sight until you want to show off how complete your costume is. Fun stuff.

Star Trek fans and collectors will love this one-of-a-kind, mini-size collectible communicator with light and sound. The communicator is used for voice communication and serves as an emergency-signaling device for Starfleet. Kit includes a replica of the iconic communicator, with light and sound, and a 48-page book on the history of

communicators, complete with full-color photos.
