Shuttlecraft Galileo is an awesome buy for star trek fansBy Luther MahoneyI love these mini toys (Star Trek, GIJOE, Batman, Gargoyle) and added this one to my collection.What does not tell you is that this is not just any shuttlecraft but it is the Galileo. This brings back some nice memories of my hallmark/Galileo with Spock's voice (RIP Leonard Nimoy!) on it. While this one does not have any sounds it does light up albeit only on the rear thrusters. Honestly I wished that this would have had some more lighting especially in the front windows which are just painted black but given the price I guess I should not be too picky.For those you that have the Enterprise light-up toy this one is the same size and is pretty impressive.It also comes with a stand, mini booklet and nice box that holds everything together. Overall I am happy with this and feel that this is almost as good at the enterprise \$10 toy.Notes:Worth The Money: YesWould I Recommend It: Yes

Star Trek fans and collectors will love this one-of-a-kind, mini-size collectible light-up shuttlecraft.
