

information) is completely wrong in the guide. For example, the latest problem I found was from Maanan doing the Swoop races. The final prize for the last tier is 2000 credits, however the guide only lists it as being 800 credits. In previous worlds some of the sidequests marked on the maps were incorrectly placed and are actually located on the complete opposite side of the map. If you are planning on purchasing this product solely for the information, I would think twice. Save your money and just reference what you need to online. The book is handy, like I said though, for just looking over the maps themselves or giving you an idea of how many quests there are per world but if you are wanting to cheat your way through the game and follow a guide all the way through, there are plenty of places online you can find 100% correct information for free. This is likely the very last guide I will ever purchase unless I get a deal like I did before, where my order is cheaper if I include the guide.

Great game, Terrible book

Great game, Terrible book. Errors constantly throughout the book, makes you wonder if the creators of the book ever played the game. Lots of vague info shows they didn't put much concern into this book. I own a LOT of strategy guides and this one is at the bottom of my list as far as quality and helpfulness

By Mike W. Barr
This guide is not very helpful. Though the maps are thorough and are helpful, there is a coding system used to label them and their areas that does not seem to be referenced anywhere else in the guide. Game play is very repetitive, and there are very few hints to aid the player when s/he reaches a particularly hazardous area. The overall goal of the game is not clearly stated, nor is how long (estimated) it will take the player to reach his/her goal. Not recommended.
