The pages contain some questions or prompts, however there is no space to create on any of the pages due to the fact the author has already doodled on them. Seriously, you have to write and draw over all of the doodles printed on the page.I have purchased almost all interactive journals available on .com and I have yet to see one that is filled to the outer boarders on almost every page. And if your curious, the pages that do leave room for the poor sap that bought the book are eitherA. Literally just blank pages (use printer paper it's cheaper)OrB. Stupid quotes like "do it!!!!!!" Yes with all those exclamation points. OK kate, do what?you've already filled out this beast of a journal. That is to say this book is big! Much larger then a paperback and with a substantial amount of pages, however as stated before, those pages in my mind are unusable.Never have been a fan of coloring over someone else's art. Plus, it distracts from what I'm creating. I'm rambling now but I can not believe this seriously

got last editors, publishers, friends.....(Purchase this book if you want to buy someone else's completed journal and have no intention of using it to create yourself)I'm returning mine.Hope this helps0 of 0 people found the following review helpful. This felt like just blank pages to meBy Jean HomerThis felt like just blank pages to me. I am not a journaler so I just didn't get it. I think if you like to write, to journal without any prompts, it would be great.1 of 1 people found the following review helpful. Its goodBy MireyaI was expecting something else.
