**From Damiani : Stphane Coutelle: Insomnies** before purchasing it in order to gage whether or not it would be worth my time, and all praised Stphane Coutelle: Insomnies:

Stphane Coutelle, a Parisian photographer and painter, presents Insomnies, a series about nighttime, and those infinite moments of half sleep, half waking, when the mind wanders freely and without constraint. This publication features his intimate portraits of women and nocturnal landscapes.

Insomnies is a tale of the night and those timeless moments when you are but half awake and your mind is traveling without control. Across the pages are intimate portraits of women pieced together with night landscapes, creating a confrontation, the beginning of an untold story of the women's wanderings. The pictures are shot in unspecified locations around the globe and carry a strong cinematographic dimension. We find ourselves drifting into those women's minds, dreams and fantasies which mysteriously relate to our own in a stirring echo. About the Author Stéphane Coutelle is a French photographer and painter, known for his stunning portraits of women, who has succeeded in combining a fine art and a commercial career.
