Robert E. Manning : Studies in Outdoor Recreation, 3rd ed.: Search and Research for Satisfaction before purchasing it in order to gage whether or not it would be worth my time, and all praised Studies in Outdoor Recreation, 3rd ed.: Search and Research for Satisfaction:

0 of 0 people found the following review helpful. ... really a very comprehensive review of the subject with great references. By John Schijf This is really a very comprehensive review of the subject with great references. 0 of 0 people

found the following review helpful. Terrific update of a classic textbook
By Randy Botkin
Finally, Robert Manning updates a classic outdoor recreation textbook used in almost all Recreation Management curriculum in the United States. Succinct and spot on, Manning re-examines basic concepts in his quest to explain why outdoor recreation visitors behave as they do. Terrific text.
0 of 0 people found the following review helpful. A great tool for outdoor recreation majors.
By Tigresblanco
This book is well written and contains not only great information from Manning, but every resource he cites in his writing is useful. I think this book is a MUST for any studying to be in the field of outdoor recreation.

For twenty-five years, *Studies in Outdoor Recreation* has been a standard text in courses on parks and outdoor recreation and serves as an invaluable reference for park and recreation managers. The first book to integrate the social science literature on outdoor recreation, it reviews studies from this broad, interdisciplinary field and synthesizes them into a body of knowledge, providing an historical perspective on outdoor recreation research and developing its practical management implications. This third edition is completely revised to reflect current research and new concerns in the field. A new chapter examines the emerging issue of sense of place and its relationship to outdoor recreation. The book concludes with twenty principles to guide outdoor recreation management and research. An extensive bibliography and *A Guide to the Social Science Literature in Outdoor Recreation* lead readers to valuable primary source material. An essential resource for students, scholars, and professionals, *Studies in Outdoor Recreation* explores the theoretical and methodological issues in outdoor recreation and describes the management implications of outdoor recreation research.

About the Author
Robert E. Manning is Professor of Recreation Management in the Rubenstein School of Environment and Natural Resources at the University of Vermont. He is also Director of the university's Park Studies Laboratory, which conducts a program of research on national parks, wilderness, and related areas.
