Michael Mepham : Sudoku To Go: Diabolical before purchasing it in order to gage whether or not it would be worth my time, and all praised Sudoku To Go: Diabolical:

impossible. It requires the "guessing" ahead 4 to 20 steps, which to me is a little annoying for everyday puzzles. However, I do enjoy having this book around for a change-of-pace challenge a few times a month. This is similar to his puzzles that he ranks as a "4" in some of the newspapers he posts in. I also tried the Black Belt ones and this is similar. 1 of 1 people found the following review helpful. nasty! By Mike Davis Like chess, you have to look several moves ahead - or guess! It's as advanced a collection as I've seen. 5 of 5 people found the following review helpful. need to guess to solve By J. Ray While the puzzles in this book are definitely difficult, I found them very frustrating - of the first five puzzles that I tried, I could solve only two of them without resorting to guessing. The author states in the introduction that many of the puzzles require guesswork, but I didn't read the entire intro before purchasing the book. I quit after the first five. If you like really tough Sudokus that can be solved by logic alone, I'd stay away from this book. If you don't mind working through puzzles using guesswork, this is a nice book as the puzzles are much tougher than most other 'difficult' books that I've used.
