By Maureen Dolan
Each card has a picture of a crystal, with the name of that crystal and the tarot card it's been linked to. There are 78 cards in total (the same as a standard Tarot deck). If you're already really familiar with the Tarot card meanings, you'll soon learn to link those qualities to the crystal on the card. But - you would need to already either be familiar with the Tarot card meanings, or crystals, in order to be able to use this set. There are no 'clues' to the cards meaning through symbolism as there is in a more traditional Tarot deck. I absolutely love crystals, so I'm learning Tarot by already having a good grasp of crystals and their meanings. The only negative for me, is that the reverse side of the cards are a bit bland. They're a beautiful - but plain - turquoise colour. I would have liked the reverse of the cards to have a bit more 'bling'
Other than that, I'm enjoying learning Tarot through crystals, with this set.

I ordered this deck to help combine my interests in crystals and in Tarot. It is a unique deck, consisting of photographs of the different gemstones. It's definitely unconventional, and not a deck for beginners, but it now serves a fun purpose in my professional readings. I ask clients to draw a card from the deck, and then explain the properties of the stone they drew. The results are very nice, many of the people draw stones that are special to them already! I recommend this deck as a novelty for collectors, and as a useful tool for readers to start off a reading with another deck. I do not think it is a good deck for doing a whole reading with, however.

I have been collecting tarot decks for the last several years. Although the decks are all considered "traditional" the themes of the pictures/artwork are sometimes not to my taste. This deck uses beautifully done photos of stones and gems with each photo showing outstanding examples of each stone often in multiple stages from natural to fully cut/faceted and finished. Rocks and gemstones have always drawn my attention and this special deck includes not only the more traditional card interpretations but the influences of the stones pictured, matching rather well the stone to the card. I now have the deck at work and draw a card each morning, reviewing the stone and card interpretations then leaving it standing next to my computer monitor to meditate on through the day. The deck so intrigued some of my fellow employees that they got their own deck and get together on their break each day to draw a card each and discuss the stones in terms of what is going on in their lives. It has been interesting to watch people who might have been intimidated by a "tarot" deck walk by and want to join the discussion, drawn by the stones and the stone lore being discussed.

The power of gemstones, minerals, and crystals combine with the wisdom of tarot to create a unique and sparkling deck of full-color photographs.
