Igor Khmelnsky, Michael Khodarkovsky, Michael Zadorozny : Teaching Chess, Step by Step: Exercises

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Teaching Chess, Step by Step: Exercises:

1 of 1 people found the following review helpful. Gift for me...By DDI ordered this for grandmom so I can teach myself something about chess before I go back to visit my grandchildren, who love playing and taught me about the game during my last visit. Next time I want to be able to have more fun playing with them. They will be surprised! Thank you. 1 of 2 people found the following review helpful. A great book for beginners By Joe A great book for all beginners in grades K-6. It is a great primer for introducing the pieces, basic rules, and tactics. The student can use this book as a workbook for both lessons and homework. Highly recommended.

This book is designed to be a companion of Book 1, Teaching Chess Step by Step Teacher's Manual. It contains a series of exercises designed to reinforce the knowledge that children gain from the teacher's presentations in the classroom. The exercises were designed for K-12 beginners and require a minimum of explanation. The solution may be written in chess notation or drawn on the board. The teacher can use the exercises for presentation in class or as homework. They are designed for individual or group use. With respect to homework, it is advised that during the class the teacher shows some examples that are slightly modified versions of the exercises in the book, so the children will gain some understanding of the subject matter and what is asked of them.

About the Author Igor Khmel'nitsky is an International Master and author of the best-selling books Chess Exam and Training Guide and Chess Exam and Training Guide: Tactics
